

Client Support & Operations Portfolio

Samantha Eichelberger

Berne, IN 46711

seichel.career@gmail.com

1 (260) 301-4371

Experienced Operations & Process Improvement Leader with a proven track record in managing teams, optimizing workflows, and ensuring quality assurance. Expertise in process improvement, root cause analysis, and KPI reporting to drive operational efficiency. Eager to leverage skills and experience to support and enhance operational success in a dynamic environment.

CORE SKILLS

- Process Improvement
- Root Cause Analysis
- 5S Methodology
- Operations Management
- KPI Reporting & Dashboards
- Workflow Optimization
- Quality Assurance (QA)
- Data Analysis & Accuracy
- CRM Systems
- Data Privacy and Confidentiality
- Customer Service & Client Support

Production Supervisor - FCC

Sep 2025- Apr 2026

- Directed daily operations for a team of 60+ employees, managing scheduling, output targets, and resource allocation
- Conducted 15+ monthly investigations to identify root causes of recurring issues; implemented corrective actions that eliminated repeat errors
- Analyzed operational and financial data to identify discrepancies and improve budget accuracy

PROCESS IMPROVEMENT PROJECT: Reduction of errors due to Broken Dunnage

CONTEXT: The challenge here was a reduction of downtime.

ROLE: As the Production Supervisor, my role was in making the processes more efficient

PROCESS: I observed the lines and pulled data on the most recurring errors.

OUTCOME: I was able to conclude that a lot of downtime was caused by dunnage shifting when it was loaded into the machine. I transferred this data into a PDCA.

Issue	Plan	Do	Check	Act	Assigned	Target Date
Evaluate processes and determine recurring issues to eliminate or lessen downtime.	Observe production line and pull data showing errors	Data gathered on recurring issues at a 1 month 3 month and 6 month frequency	Data shows a high number of errors 65% being caused by broken dunnage being used in production	Observe process and create 5 why	Samantha	4/4/2026
	Scheduled Maintenance	Modify machine to recenter clamps from outside to middle	Plan PM with maintenance	Machine clamps modified from outside to center	Samantha/ Maintenance Supervisor	4/6/2026
	5 why created	Train team on new inspection process	New SOP created	Training plan signed off	Team Lead	4/7/2026
	Observe error data for improvement	Data gathered at 1 week, 2 week, and monthly frequency	Data shows an improvement of 85% from errors being caused by broken dunnage	Track new metrics to show baseline improvement in production KPI	Samantha	5/10/2026

Customer Retention Manager- FlexPro Meals

March 2023- April 2025

- Redesigned internal workflows, cutting processing time by 15% and improving team throughput
- Developed and rolled out QA scorecards that drove a 26% improvement in quality outcomes
- Identified systemic process gaps and introduced structural improvements that elevated service quality
- Built KPI dashboards and reporting methods to track performance metrics and support leadership decisions
- Conducted audits and performance monitoring to ensure consistent adherence to quality standards

PROCESS IMPROVEMENT PROJECT: Elimination of Duplicate tickets in HubSpot

CONTEXT: Duplicate tickets in HubSpot are creating inefficiencies in workflow, inflating ticket counts, causing miscommunication, and delaying resolution times.

ROLE: As the Customer Retention Manager, my role was to make sure our process was efficient

PROCESS: I analyzed the ticketing system data to identify how the duplicate tickets were being created and implemented a way to eliminate them. I configured the settings in HubSpot (rules, workflows, filters)

OUTCOME: Duplicate tickets were reduced, leading to an increase in productivity, more accurate first response and resolution time, and less confusion for the customer which was shown in a 15% improvement in CSAT scores.

PROCESS IMPROVEMENT PROJECT: Improvement of CSAT Scores

CONTEXT: Developed and implemented a standardized QA scorecard to evaluate customer interactions consistently across multiple communication channels. The goal was to improve quality measurement, reduce subjectivity in evaluations, and provide clearer performance feedback to agents.

ROLE: As the Customer Retention Manager, my role was to make sure our process was efficient

PROCESS: Designed a structured QA scorecard with clearly defined evaluation criteria including communication quality, accuracy, policy adherence, documentation, and resolution effectiveness.

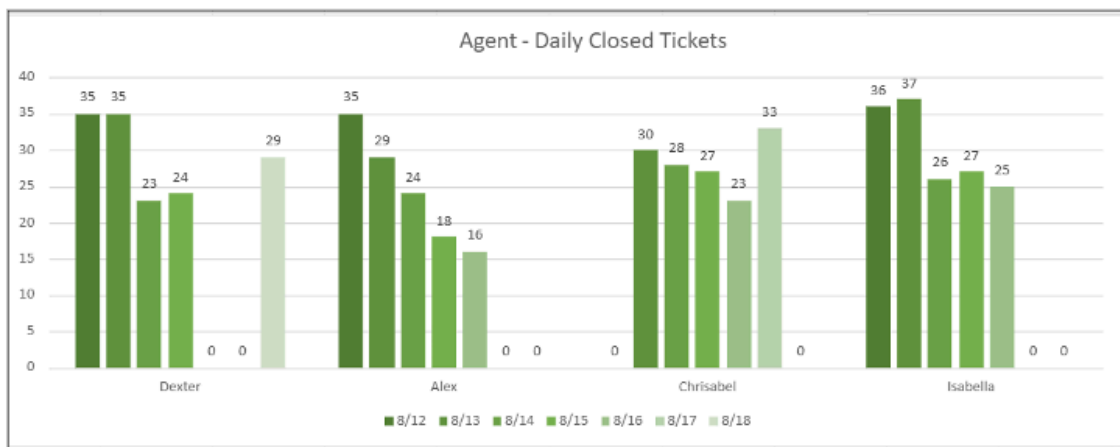

OUTCOME: Enhanced overall quality monitoring framework, resulting in more consistent performance measurement and improved consistency in performance evaluations.
